

Vault is all about discovering and designing new sounds. It's all about creativity and innovation. This concept of shaping the future of cymbals and sounds is a first. So are the results.

MADE AND PRINTED IN CANADA

WE PLAY UNIQUE SOUNDS

sabian.com

BECAUSE SOUND MATTERS

2-YEAR WARRANTY

North America – All SABIAN cymbal series are guaranteed against defects in workmanship and materials for a period of 2 years from original date of purchase. A 6-Month Warranty applies to 'Solar by SABIAN'. Cymbals replaced under our North American Warranty will be shipped only to an address in the US or Canada.

International – Please check with your SABIAN distributor for warranty coverage outside of North America.

Creative

IDEAS

Inspired by today's players.

Discover SABIAN VAULT.

Discover a collection of uniquely different cymbals and sounds inspired by today's players and the music they play.

A collection of cymbals and sounds inspired by today's players, Vault is all about one-of-a-kind ideas designed into metal. It's about reshaping vintage and modern concepts and exploring totally new territory, which means Vault cymbals vary in looks and sounds.

Vault isn't about everything being the same; it's about being different... about the innovative and the new. Vault is about different sound options for you.

Named after The Vault, that place here at SABIAN where our design team develops award-winning concepts, Vault originally launched with two models; the Artisan Ride and the Vault Crash (now named V-Crash). Because they are inspired by today's players, cymbals originally comprising our Signature series are now in the Vault collection. And there will be more new Vault models as the SABIAN Vault Team discovers new ideas.

With our Vintage, Modern, and Bronze Beginnings categories containing series with specific types of cymbals and sounds, Vault is central to our Creative category, because it accommodates all those diverse and creative ideas that fall outside the sounds of our other series.

With SABIAN you know we are constantly experimenting with new ideas. And with Vault you will find a world of sounds you won't find anywhere else.

Artisan

With 'high density' hand hammering by master SABIAN artisans, these premium cymbals highlight the finest traditional craftsmanship.

V

Powered by the silver in their B20 bronze, Vault V models deliver sounds that slice through the music around them.

Signature

Inspired by player's including Mike Portnoy, Neil Peart, Will Calhoun, and Jojo Mayer, signature models add a personalized selection of sounds to the Vault collection.

Endless Possibilities

Because the SABIAN Vault Team is constantly in search of new ideas to design into sounds, new models will continue to be added to the Vault collection.

"The Fierce Ride is like a complex wine, with many different flavors inside."
